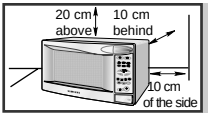
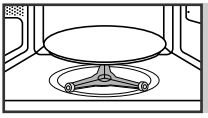
Installing Your Microwave Oven

GB

Place the oven on a flat, level surface strong enough to safely bear the weight of the oven.



1 When you install your oven, Make sure there is adequate ventilation for your oven by leaving at least 10 cm (4 inches) of space behind, on the sides of the oven and 20 cm (8 inches) of above.



2 Remove all packing materials inside the oven.
Install the roller guide and turntable.
Check that the turntable rotates freely.

✻ **Never** block the air vents as the oven may overheat and automatically switch itself off. It will remain inoperable until it has cooled sufficiently.

✻ For your personal safety, plug the cable into a 3-pin, 230 Volt, 50Hz, AC earthed socket. If the power cable of this appliance is damaged, it must be replaced by a special cable. Contact your local dealer to have it replaced.

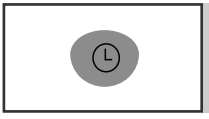
✻ **Do not** install the microwave oven in hot or damp surroundings like next to a traditional oven or radiator. The power supply specifications of the oven must be respected and any extension cable used must be of the same standard as the power cable supplied with the oven. Wipe the interior and the door seal with a damp cloth before using your microwave oven for the first time.

Setting the Time

Your microwave oven has an inbuilt clock. The time can be displayed in either the 24-hour or 12-hour notation. You must set the clock:

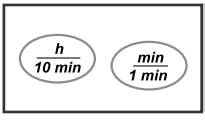
- ***When you first install your microwave oven***
- ***After a power failure***

➢ Do not forget to reset the clock when you switch to and from summer and winter time.

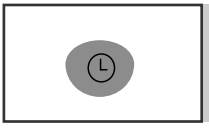


1

To display the time in the...	**Then press the ⏲ button...**
24-hour notation	Once
12-hour notation	Twice



2 Set the hour with the **h** button and the minutes with the **min** button.



3 When the right time is displayed, press the ⏲ button again to start the clock.
Result: The time is displayed whenever you are not using the microwave oven.
